About

Cloud and Data Engineer with 5.5 years of experience across Software Engineering, Machine Learning, DevOps, and Data Engineering. Passionate about building scalable, reliable and efficient systems with a strong focus on continuous learning and self-development.

Backed by a solid engineering background and hands-on industry experience, consistently delivering high-quality solutions while contributing effectively within collaborative and multicultural environments. Through volunteering and leadership activities, developed strong soft skills including project management, teamwork, leadership, negotiation, conflict resolution, and public speaking.

Areas of Expertise

Cloud Engineering, DevOps, Data Engineering, Machine Learning, Software Development, IoT, Databases, Smart Grids & Renewable Energy

Work Experience

Principal Data Engineer Consultant, Valcon

Utrecht, NL Oct 2024 - present

Delivering cloud and data engineering solutions for enterprise clients, focusing on scalable data platforms, ETL workflows, and cloud-native application infrastructure.

ASN Bank (Feb 2025 - present)

- Contributed to the delivery of a remediation platform processing data for approximately 6.5 million clients.
- Took ownership of complex technical deliverables, coordinating development efforts and ensuring successful end-to-end delivery.
- Organized and coordinated integration testing activities with involved stakeholders to ensure smooth system integration and delivery quality.
- Designed, developed, and maintained cloud infrastructure and deployment workflows for a Python-based application in AWS.
- Implemented and deployed Kafka-based message streaming solutions to support scalable and reliable event-driven communication.
- Designed and optimized CI/CD pipelines to automate deployments, improve delivery reliability, and streamline development workflows.
- Mentored and guided junior colleagues through technical support, knowledge sharing, and collaborative problem-solving.

Related skills: Python, AWS, Databricks, Kafka, CI/CD, Docker, Shell Scripting, Data Engineering, Git, Scrum

Software Engineer, Adaptive Sensory Technology

Munich, GE Sep 2022 - Aug 2024

- Revamped and optimized the existing codebase by implementing performance improvements and developing new features for a high-end ophthalmological solution used to efficiently assess patients' eyesight.
- Automated device deployment and installation workflows, reducing setup time by approximately 80% and significantly improving operational efficiency.
- Designed and implemented a centralized logging system in C++, improving issue diagnosis, maintainability, and overall system reliability.
- Contributed to the company's DevOps initiatives by developing CI/CD testing workflows and supporting the transition to an improved release and branching strategy.

Related skills: Python, C++, Java, JavaScript, Shell Scripting, Git, CI/CD, DevOps, Software Engineering

Mandatory military obligations, Greek army

Nov 2021 - Aug 2022

Machine Learning Engineer - Research Associate, CERTH

Thessaloniki, GR Jan 2020 - Oct 2021

Conducted research and delivered software solutions for EU-funded H2020 green energy projects, focusing on multi-source data processing, time-series forecasting, and deployment of machine learning services.

- Designed and developed IoT edge-device modules for smart grid asset management and energy optimization, achieving over 90% forecasting accuracy and enabling participation in local energy trading marketplaces.
- Developed and deployed AI-driven tools for distribution network modeling, state estimation, and predictive maintenance of energy grids.
- Built ensemble machine learning models to predict maintenance needs and recommend optimal maintenance actions, reducing operational cost and minimizing service unavailability.

Related skills: Python, C/C++, SQL, Machine Learning, Time-Series Forecasting, IoT, Data Engineering, CI/CD, Git, Research

Education

MSc Electrical & Computer Engineering, AUTH

Thessaloniki, GR Sept 2013 - Nov 2019

Specialization area of Electronics & Computer Engineering

- **Thesis:** Similarity-based Multiple Kernel Estimation of Rice Agronomic Traits using Multispectral Imagery.
- **Erasmus Exchange Program:** AGH University of Science and Technology, Krakow, Poland (Feb 2017 - Jun 2017).
- **Volunteering Activities – Board of European Students of Technology (BEST)** (2015 - 2020):
 - President of BEST Thessaloniki (2017 - 2018).
 - Member of the Corporate Relations and Information Technology teams.

Skills

- **Programming Languages:** Python, Bash, SQL, C/C++, Java, Matlab
- **Technical skills:** AWS, Docker, CI/CD, Git, IaC, Kafka, Machine Learning, Deep Learning, REST APIs, Database management, Kubernetes
- **Soft Skills:** Adaptability, Problem-Solving, Teamwork, Communication, Planning
- **Languages:** Greek (Mother tongue), English (C2), German (B2), Chinese (HSK 2), Dutch (A2)
- **Certifications:**
 - [AWS Certified Solutions Architect – Associate, Amazon Web Services Training and Certification](#)
 - [Databricks Data Engineer – Associate, Databricks](#)
 - [Deep Learning Specialization, DeepLearning.AI](#)
